Enablers

Safety first

Robust organization

Sustainable aviation

Communities

Our innovation families

Different initiatives, same alluring perspective

Sustainable Aviation

Most sustainable airports as part of an aviation community that meets global emission goals.

Future Baggage

Disruptive, high quality baggage services to make optimal use of our capacity.

Autonomous Airside Operations

An interconnected fleet of self-driving zero-emission airside vehicles and automated processes.

Digital Identity

A personalised passenger identity to connect the many, while engaging the one.

Healthy Environments

Healthy living environments for our communities with a.o. improved air quality and reduced noise.

Multimodal Hub

An ecosystem of new, interconnected modes of seamless transport.

Here's how Schiphol will look in 2050

As you can see in our vision for 2050, Schiphol wants to become the most **sustainable hub airport in the world** in 2050. Here's how it will look like once the work is done.
